DESCRIPTION: ADDENDUM 2- MINE RECLAMATION PROJECT- VERNON SHEEPROCKS

ADDENDUM #2

Please note the following:

- 1. Because of the planned delay in the start of construction and because of snow and muddy roads in the project area, the bid opening date is changed from May 25 to June 8.**
2. The delayed date for notice to proceed with construction will be no later than August 1, 2005. A delay beyond August 1 will be considered a differing site condition.
3. Section 0200, Part 1.04.C of the construction specifications defines a required safety officer to monitor construction work underground, the Certified Person. The specified qualification for the Certified Person is someone currently certified under the General Safety Orders of Utah Coal Mines as a Mine Foreman and/or Fire Boss. In special cases, the Abandoned Mine Reclamation Program may approve a Certified Person who does not possess current Mine Foreman or Fire Boss certifications. Among other things, the qualified person must have documented underground mine employment experience with job duties including responsibility for the safety of others. Candidates for the position of the Certified Person will be considered and approved on a case-by-case basis.
4. Bird netting is not an acceptable alternative to chicken wire for bat exclusion (Section 0250, Part 3.01.F). Bats would get entangled in the netting or chew through it.
5. Digital photographs of the mines in the project are available on request from the Abandoned Mine Reclamation Program as an aid to preparing a bid.

To acknowledge receipt of addendums, either include a copy of addendum with bid submittal or give written acknowledgement with the proposal. It shall be the responsibility of the respondent to appropriately disseminate this information to all concerned prior to the assigned due date and time.
